

Telemedhub.online

The Digital Gateway to Premium Healthcare Ecosystems

Bridging Asia's medical excellence with global demand through a secure, scalable, and high-touch telemedicine ecosystem.

Time and privacy define value, yet modern healthcare remains deeply fragmented

The Fragmented Journey

The Broken Experience

Patients face limited access to specialists across regions and a complete lack of coordinated cross-border medical services.

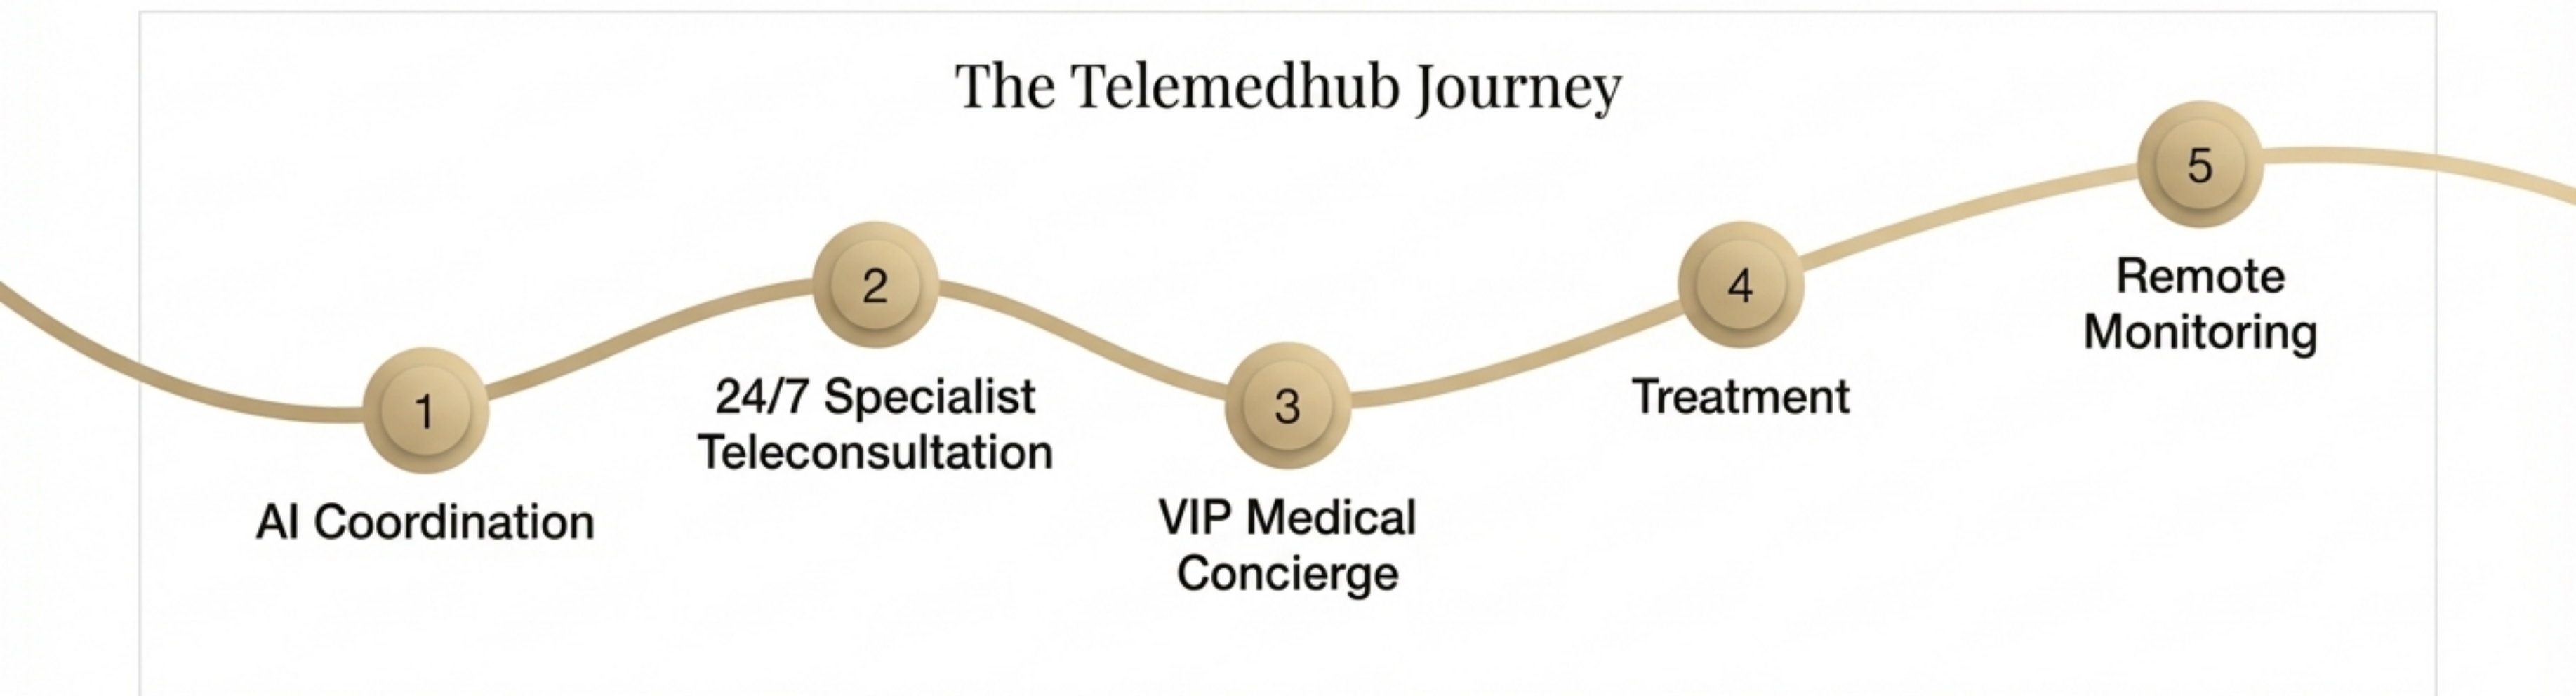

The Exclusivity Gap

Rising demand for private, premium healthcare access from HNWIs and expatriates is unmet by mass-market telehealth tools.

The Continuity Failure

A rapidly growing medical tourism market operates without essential digital continuity or secure post-treatment monitoring.

Seamless, borderless, and dignified medical access

A Unified Infrastructure

We bridge digital healthcare access with premium service execution, eliminating friction at every stage of the patient lifecycle.

End-to-End Coordination

Moving beyond simple video calls, our ecosystem integrates AI-supported triage with cross-border medical referral networks and corporate B2B solutions.

The three pillars of a luxury digital healthcare network

Precision

Clinical excellence powered by tightly curated specialist networks, ensuring high-fidelity medical guidance.

Access

Borderless medical connectivity supported by multilingual interfaces and secure, compliant cross-border data continuity.

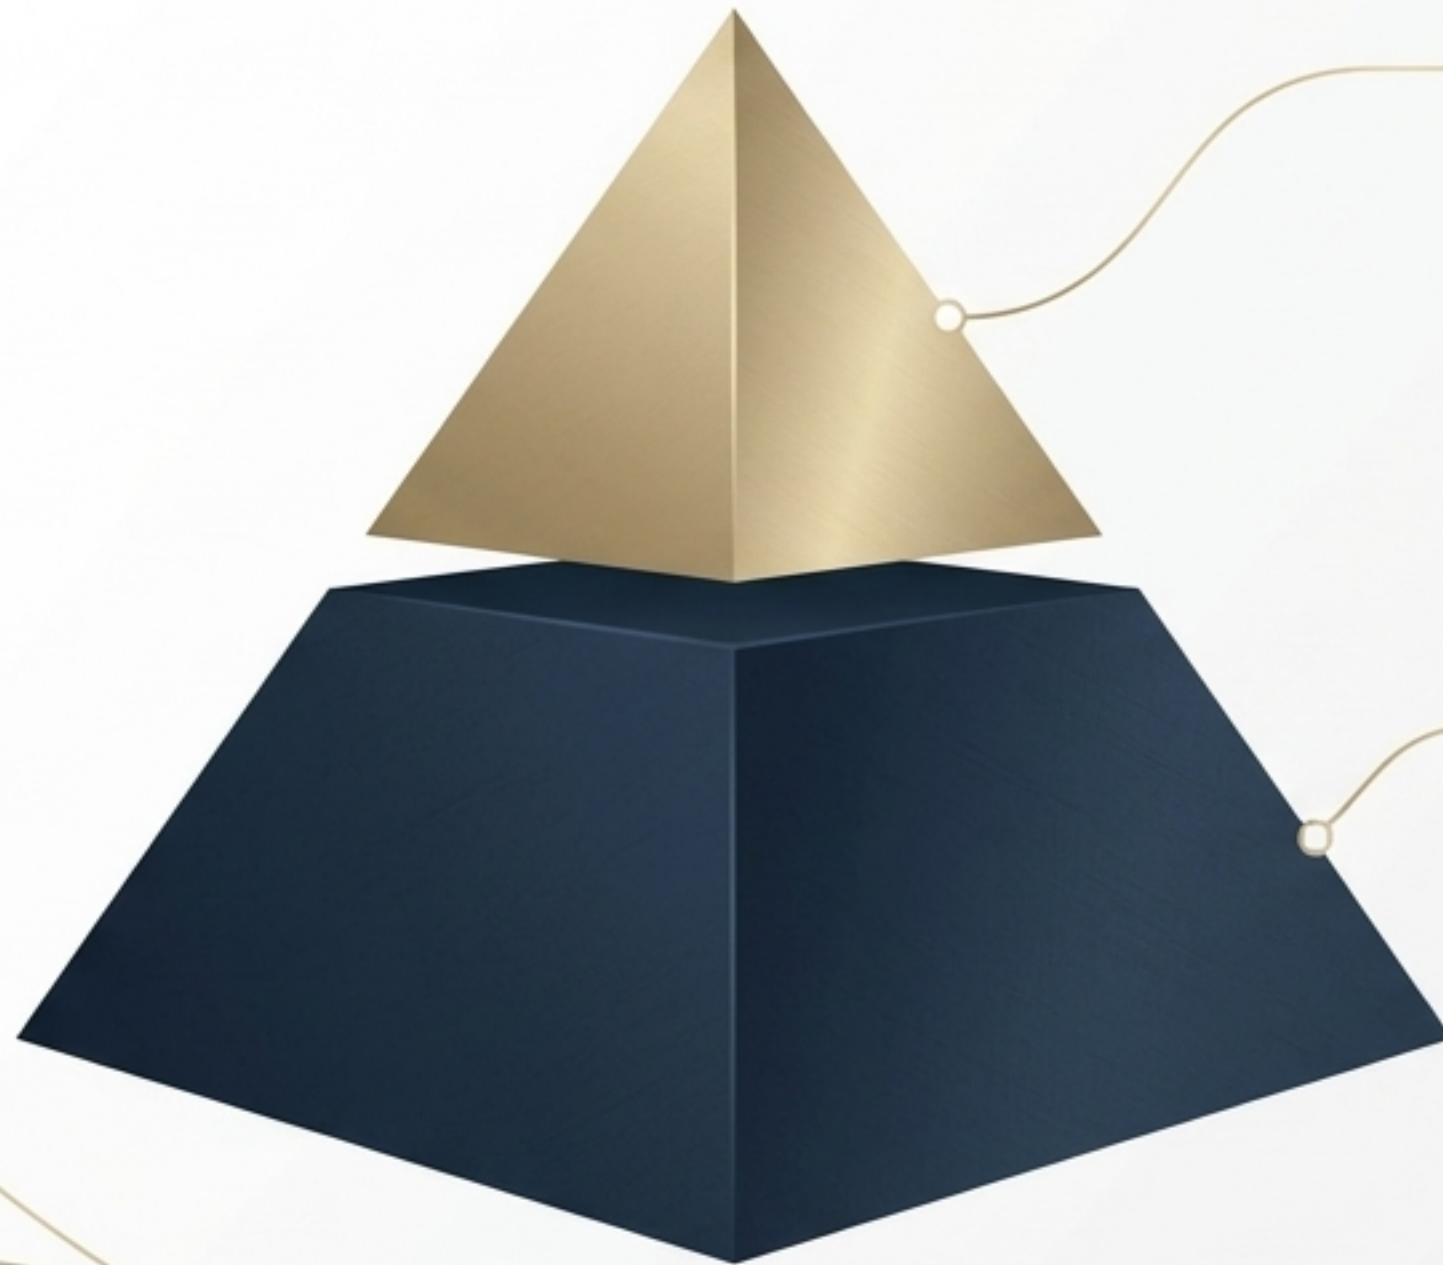

Concierge-Level Care

Every patient journey is personally overseen by a dedicated Care Manager, ensuring integrated offline service execution.

Differentiating luxury infrastructure from commoditized telehealth

	Standard Telehealth	Telemedhub
Target Focus	Mass volume, low-ticket transactions.	Premium HNWIs, expatriates, and high-value B2B corporate health programs.
Service Depth	Digital-only, single point of contact.	Integrated digital & offline execution with VIP concierge and cross-border travel facilitation.
Network Structure	Localized, highly fragmented physician pools.	Coordinated regional gateway leveraging Thailand's position as Asia's premier medical hub.
Revenue Model	Low-margin, isolated consultation fees.	High-margin subscriptions, medical tourism packages, and recurring hospital referral commissions.

A dual-market strategy balancing high margins with ecosystem stability

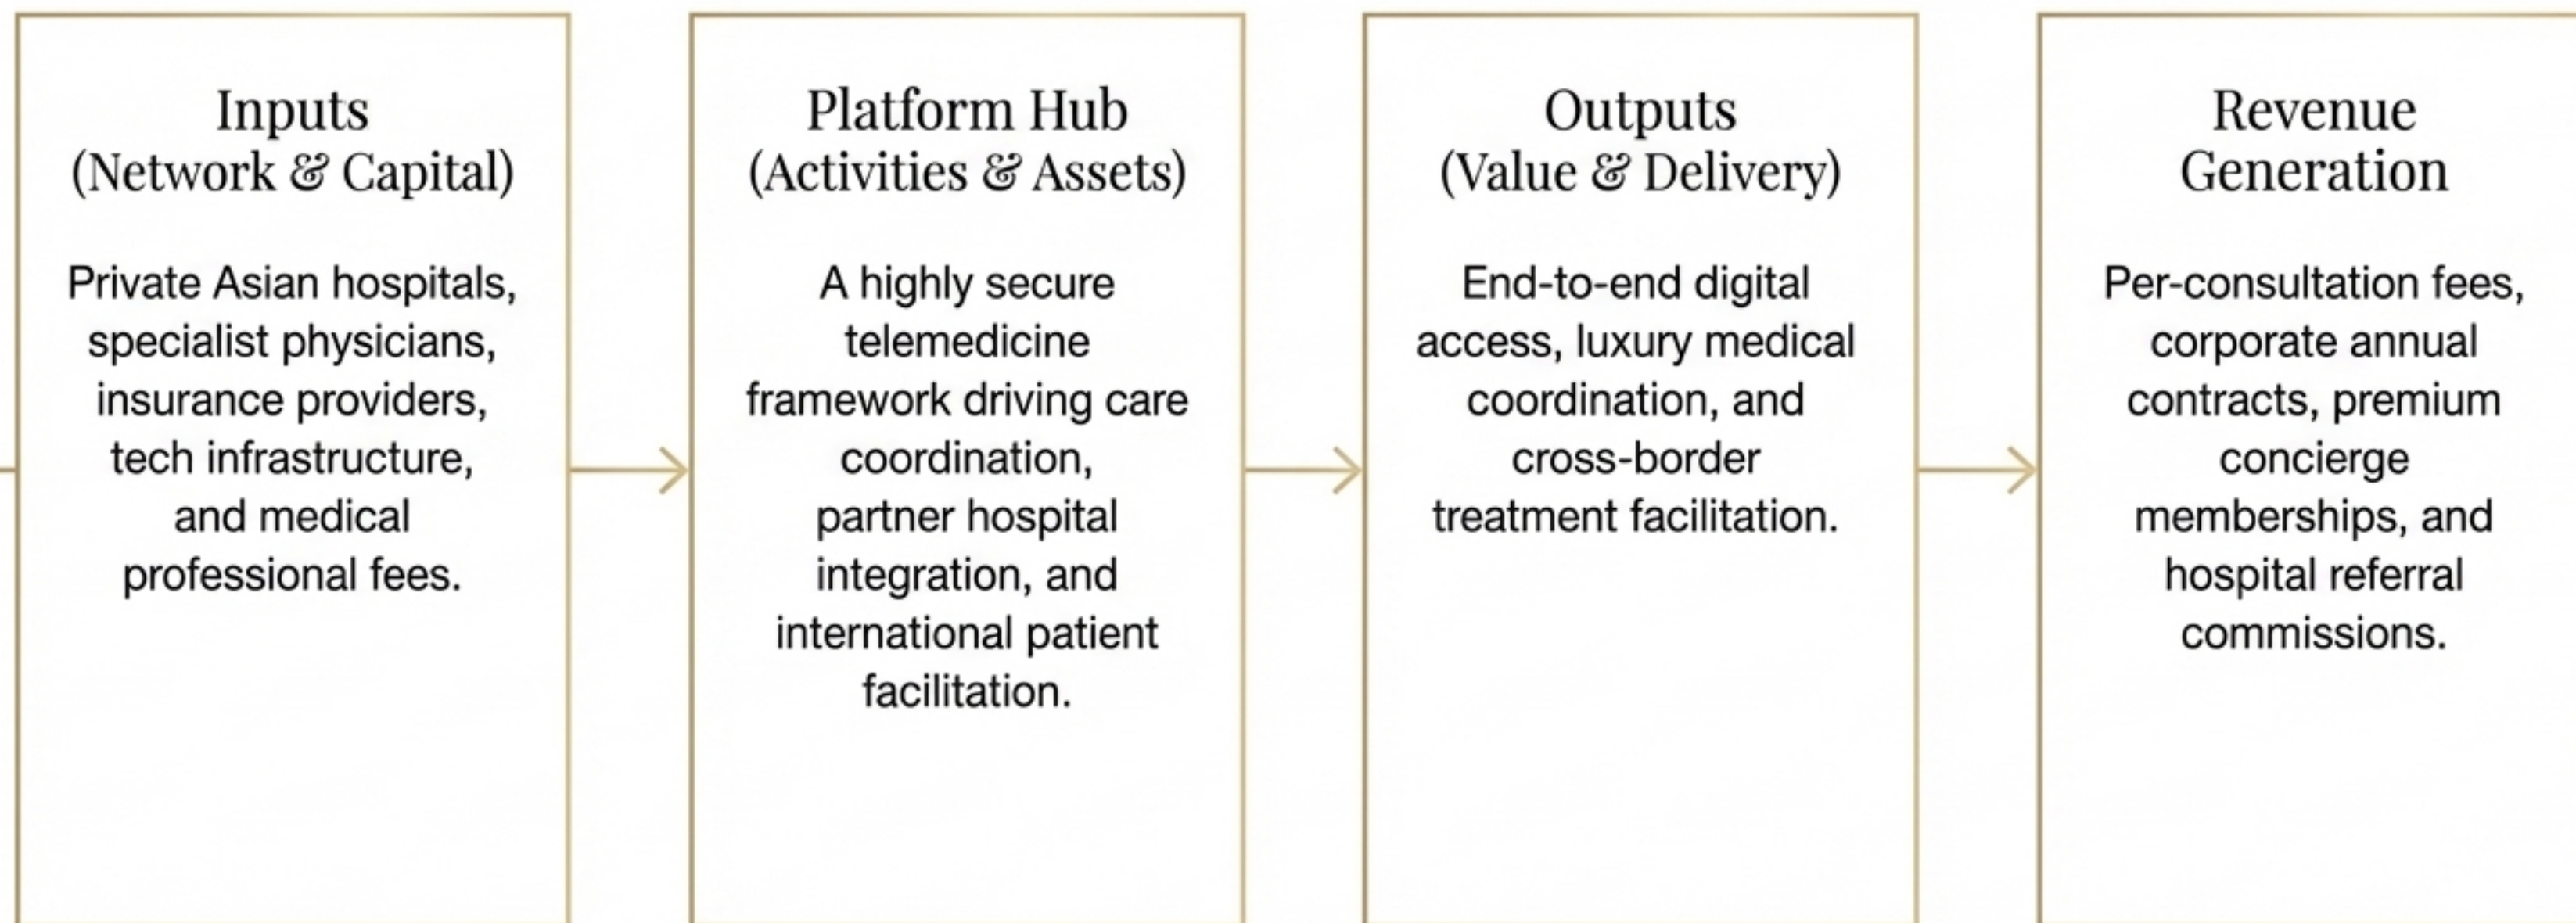

The Tip of the Spear (B2C): High-margin, brand-building premium users.

- ✓ High-Net-Worth Individuals (HNWIs) & Expatriates
- ✓ International Private-Pay Patients
- ✓ Chronic Care Patients requiring dedicated long-term management

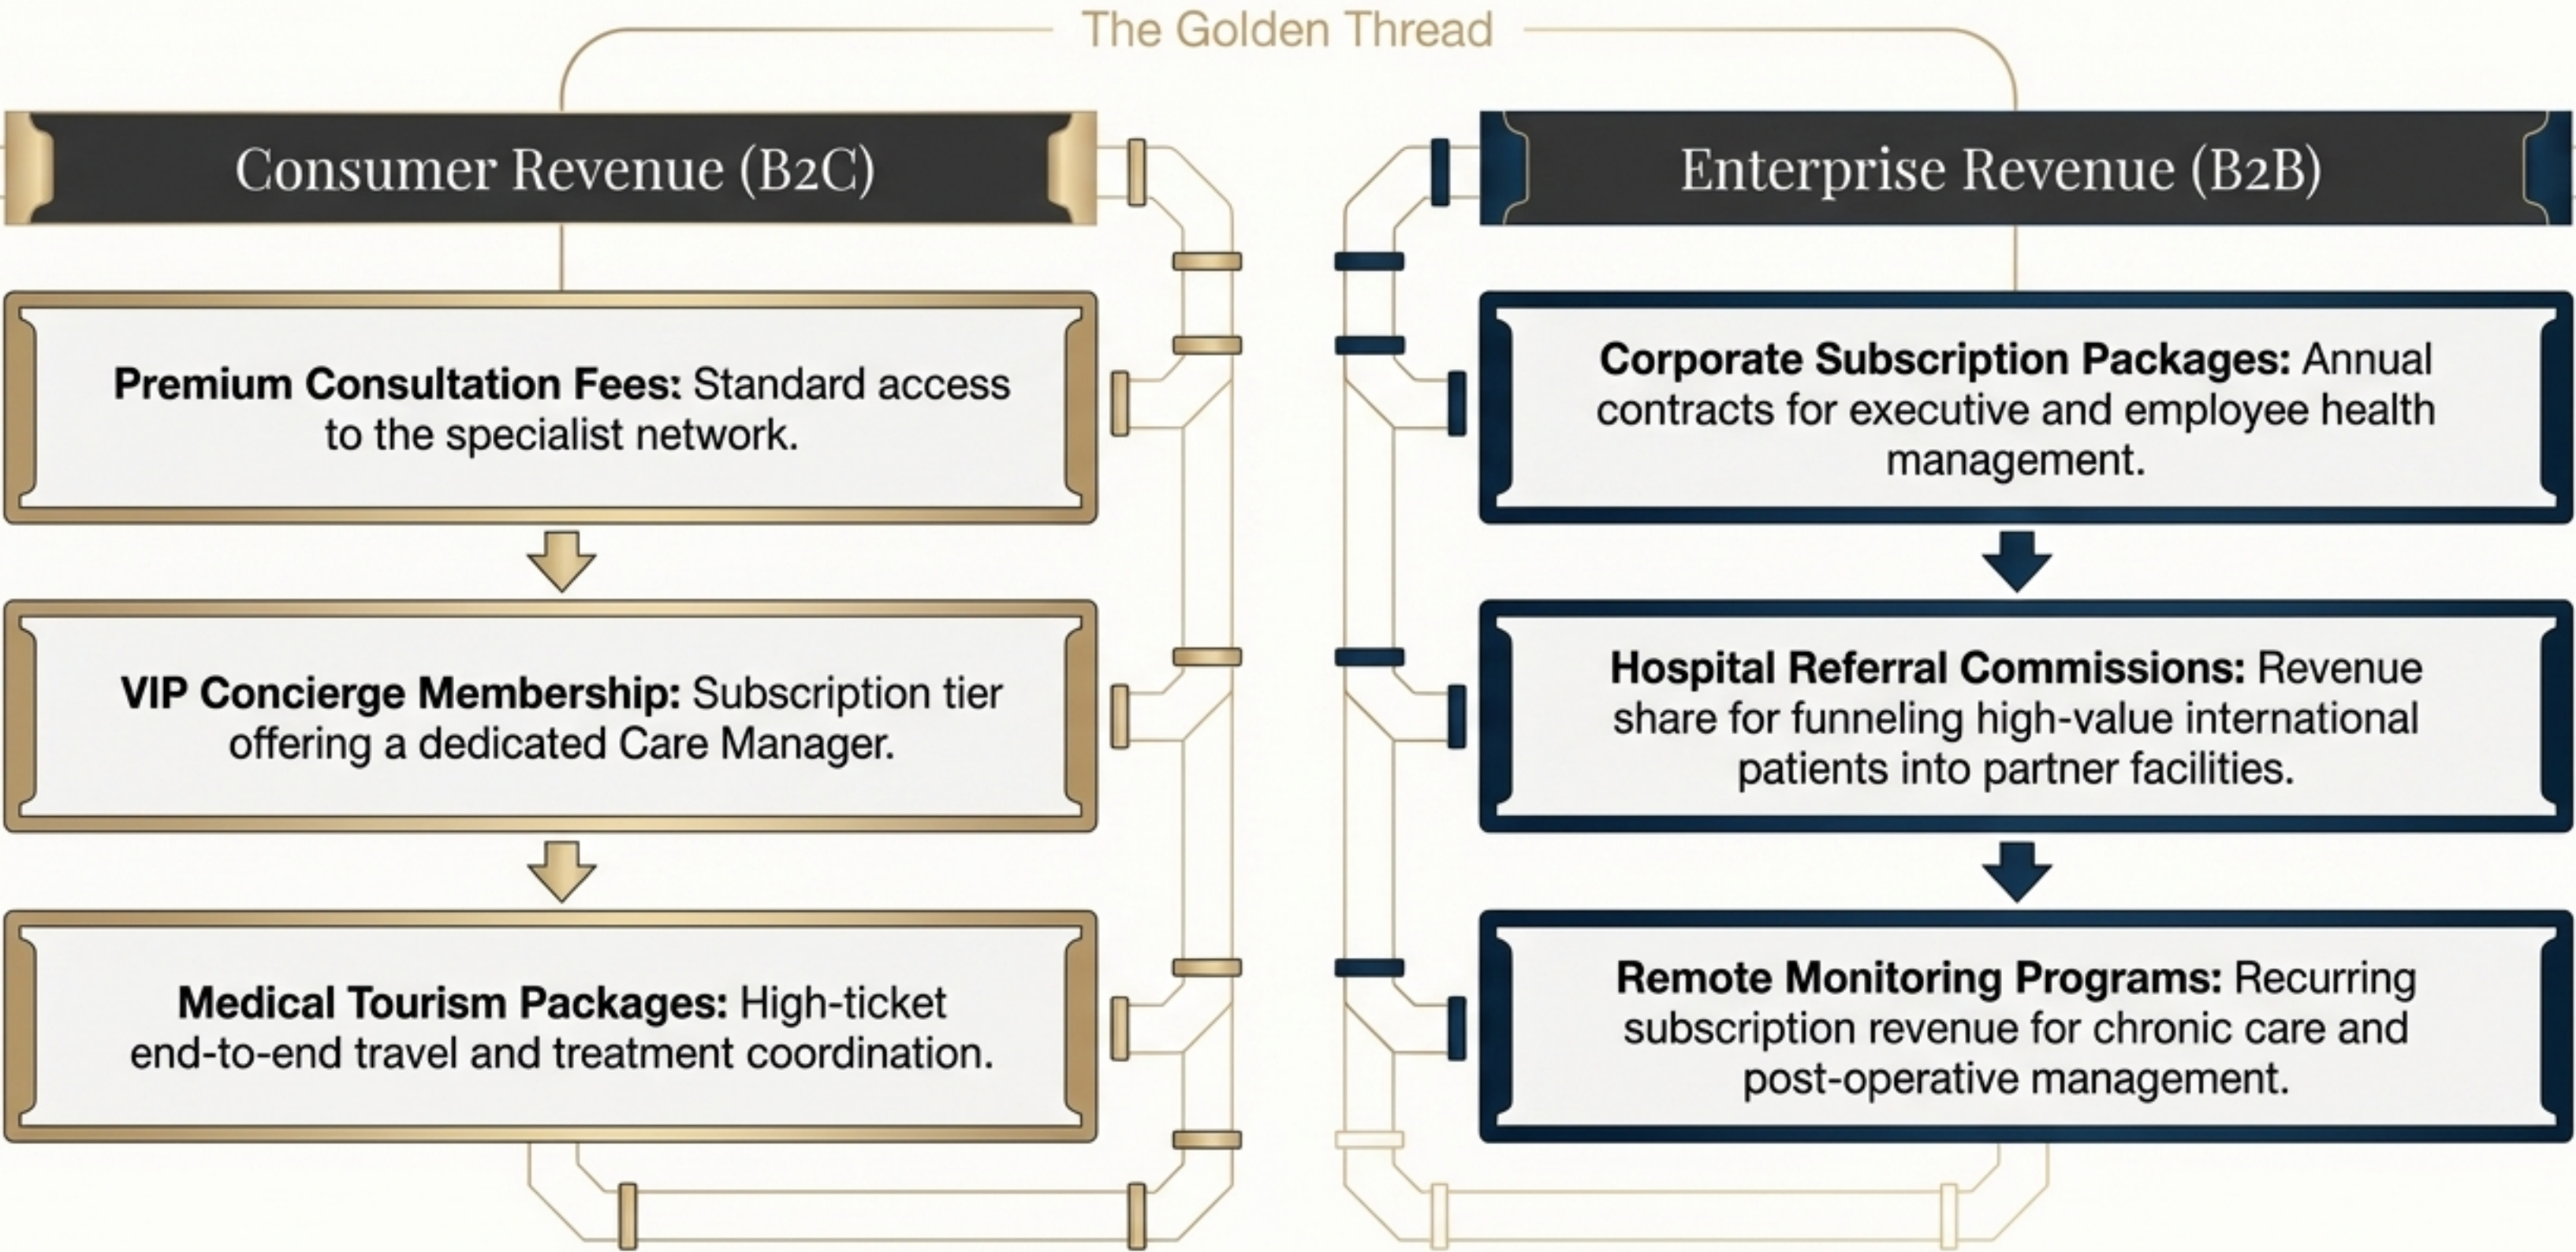

The Foundation (B2B): Broad volume, reliable recurring revenue, and ecosystem stability.

- ✓ Hospitals & Insurance Companies
- ✓ Corporations (Executive & Employee Health Programs)
- ✓ Medical Tourism Agencies & Embassy Health Units

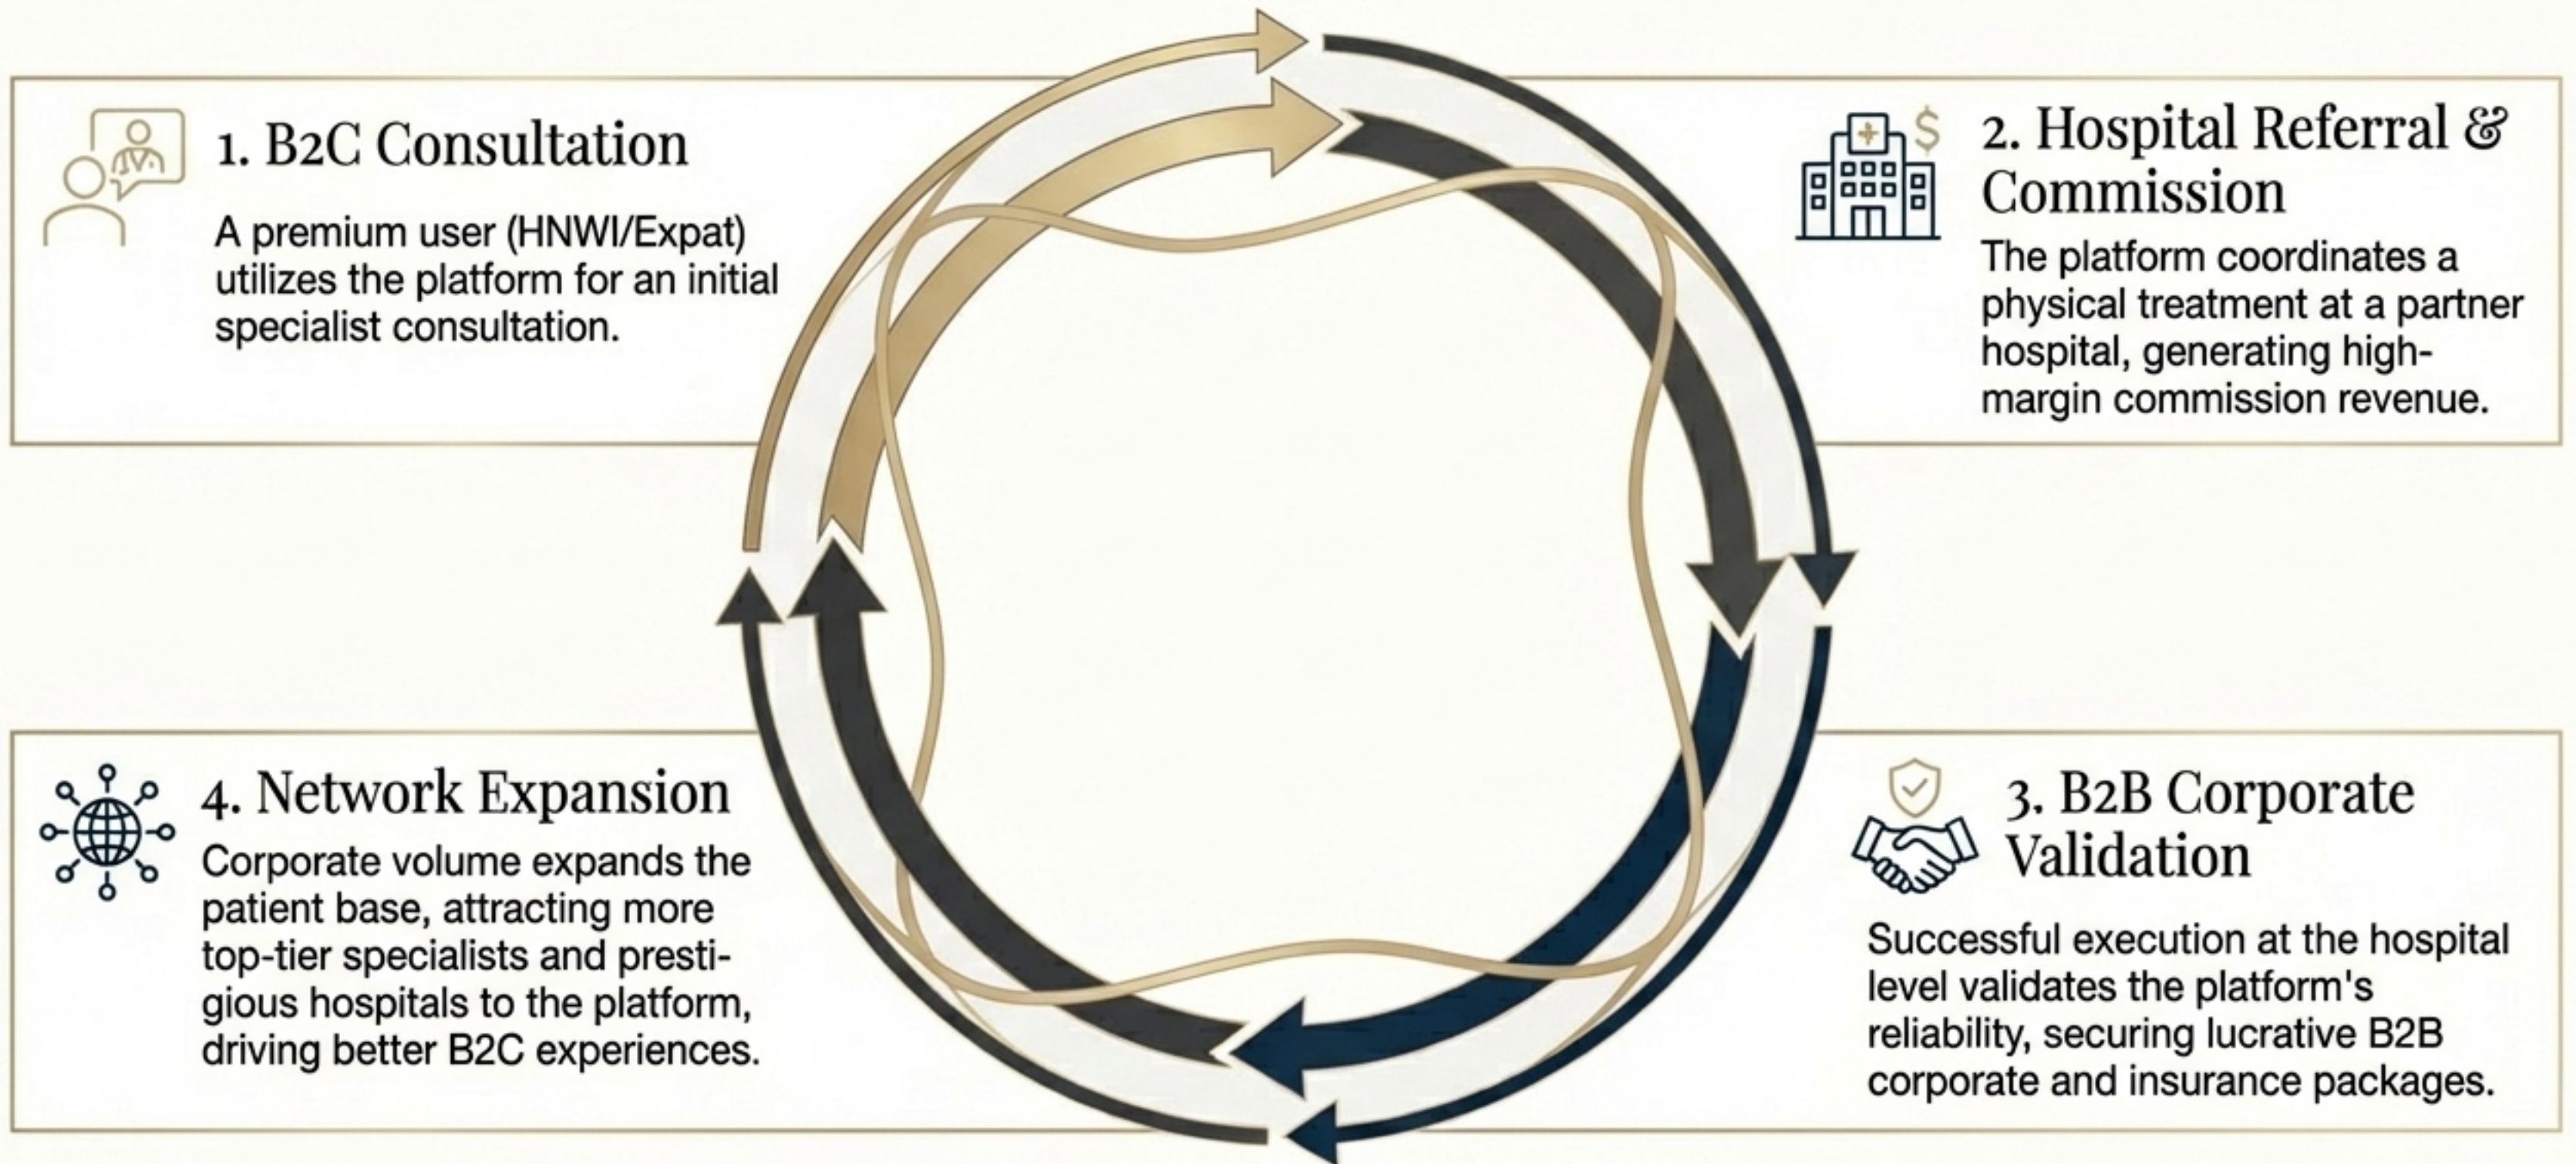

The operational engine powering concierge healthcare

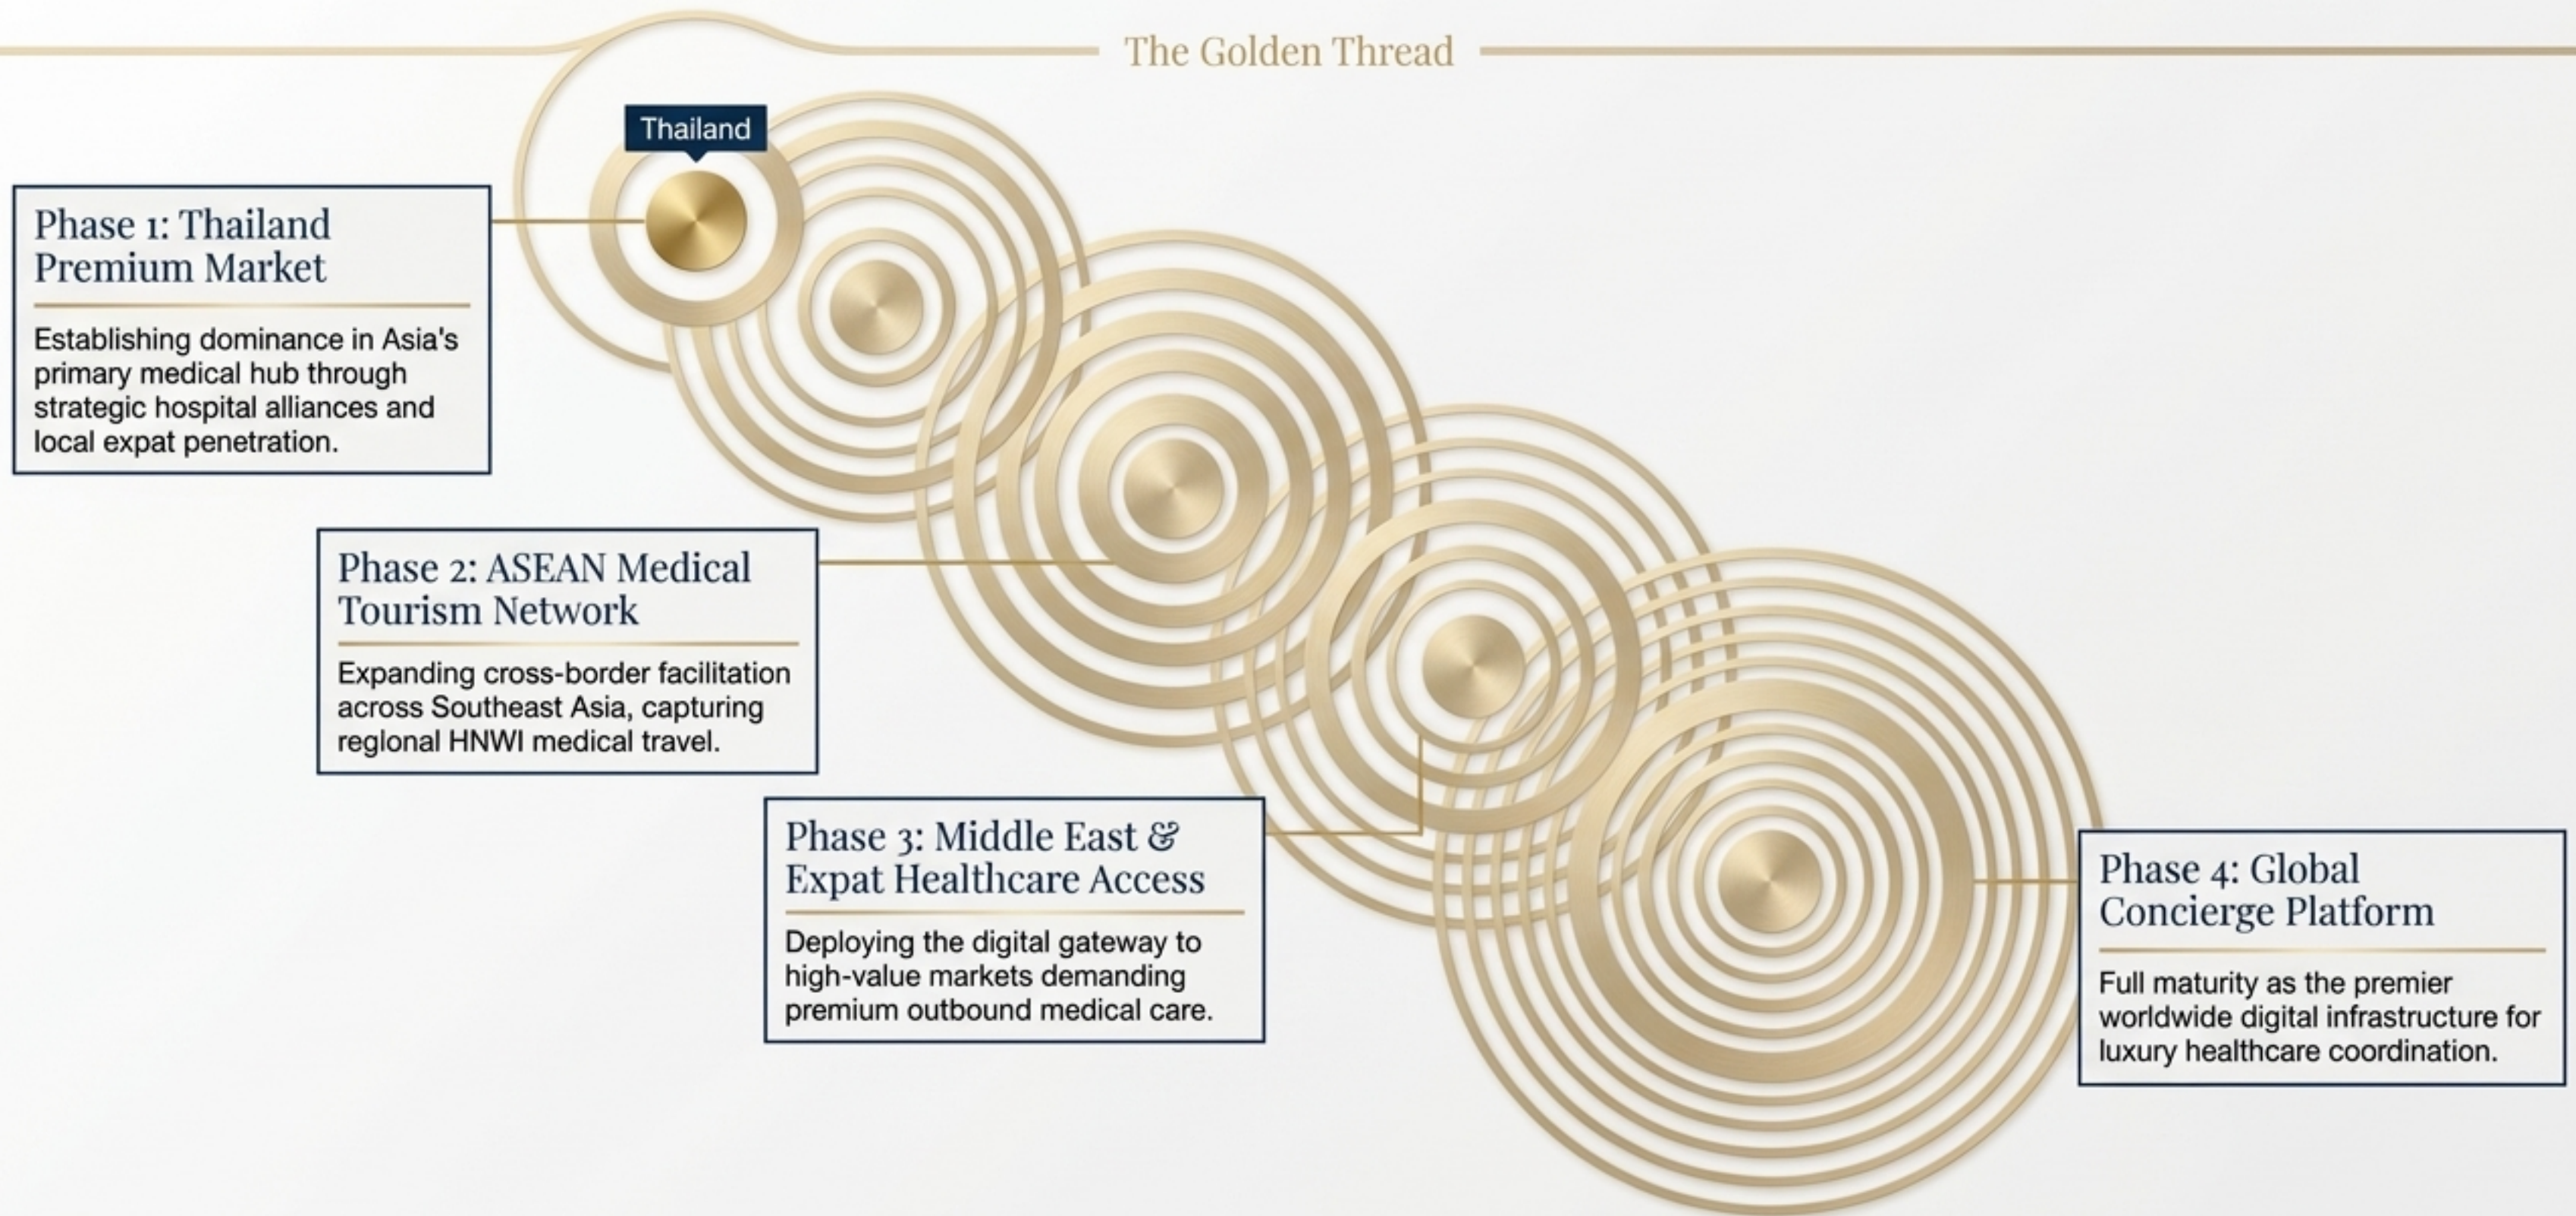

Diversified, high-margin revenue architecture

The ecosystem flywheel driving exponential network growth

A phased roadmap toward global concierge healthcare

Bridging Asia's medical excellence with global demand

Telemedhub.online is a scalable premium digital healthcare infrastructure platform.

We are securing the gateway to the future of high-margin, cross-border medical care.

Strategic Targets

Capital

Seed / Series A funding to accelerate regional expansion (Phases 1 & 2).

Clinical

Strategic hospital group partnerships to solidify the execution network.

Ecosystem

Insurance tech integration to capture B2B corporate volume.

Brand

Global establishment as the definitive luxury healthcare identity.
